DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Falk-4,994,024.

As to claims 1-2, Falk-'024 (Figs. 1-4) discloses rectilinear push pin 9 (Fig. 4), rectilinear casing defined by tubes 3 and 7 (fig. 4), hollow shaft sandwiched between tube 3 and element 5, gripping members 10 & 1a, jaw members 11 & 4.

As to claim 3, Fig. 4 shows push pin 9 having a height less than the diameter of rigid casing defined by tubes 3 and 7 (Fig. 4).

As to claim 4, Falk-'024 9 discloses a pressure surface/driving element 19 on gripping member 10 for contacting a contact surface defined by a ball-shaped element at the proximal end of push pin 9.

As to claim 5, ball-shaped element and push pin 9 defines a recess engaging an element linked to gripping member 10 (Fig. 1 and 2).

As to claim 6, at least push pin 9 can be removed from hollow shaft sandwiched between tube 3 and element 5 as a unit.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Falk-4,994,024 in view of Brown et al-5,201,752.

Falk-'024 discloses substantially the claimed invention, including a recess defined by ball-shaped element and push pin 9.

Alternatively, Brown et al-'752 (Fig. 1-2) discloses a recess defined by push pin 19 at location 29 shown in Fig. 2 engaging gripping handle 21. It would have been obvious to one of ordinary skill in the art at the time of the invention to modify push pin 9 of Falk-'024 to have a recess engaging an element linked to gripping member 10 as this configuration is just another suitable design for an engagement between the push pin 9 and the gripping element 10 of Falk-'024 device.

Response to Arguments

Applicant's arguments with respect to claims 1-6 have been considered but are moot in view of the new ground(s) of rejection as indicated above.

Art Unit: 3734

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
